COURSE: ART277

ASSIGNMENT: #2

NAME: ALEXANDER T. SALVAGE

ID: 5406

Where can I get some?

There are many variations of passages of lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or <u>randomized words</u> which don't look even slightly believable. If you are going to use the passage of lorem Ipsum, u need to be sure there isn't *anything embarrassing hidden in the middle of text. All the lorem Ipsum generators on the internet tent to repeat predefined chunks as necessary, making this the first true generator on the internet.* It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures, to generate lorem Ipsum which looks reasonable. The generated lorem Ipsum is therefore always free from repetition, injected humour, or non characteristics words, etc.

What is lorem Ipsum

lorem Ipsum is simply dummy text of the printing and typesetting industry. lorem Ipsum has been the industry's standard dummy text ever since th 1500s, when an unknown printer took a gallery of text and scrambled to make it a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1o60s with the release of Letraset sheets containing lorem Ipsum passages, and more recently with desktop publishing software like **<u>Aldus PageMaker</u>** including versions of <u>lorem Ipsum.</u> 1914 translation by H. Rackham.
lorem Ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam,quis nostrud exercition ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolor eu fugiat mulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est.

Why do we use it?

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using <u>lorem Ipsum</u> is that it has a normal distribution of letters, as opposed to using "content", making it look readable English. Many desktop publishing packages and web editors now use lorem Ipsum as their default model text, and a search for "lorem Ipsum" will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).
